

British School
of Bucharest

Environmental Statement of Intent

BSB is committed to educating our students and managing the school with responsibility to the environment at the forefront of our thinking.

The School will seek to minimise environmental harm as a result of its operations, where possible, attempting to minimise energy consumption and purchasing items which are not supplied with excessive packaging; which are benign or the least harmful in their effect on the environment. Where possible, preference will be given to local or regional suppliers to maximise the School's input to the local community.

BSB will seek to minimise its generation of waste and re-use materials where possible. Where reduction or re-use is not feasible, materials will be recycled wherever possible and recycling will be actively encouraged.
